BOARD & CABLE INTERCONNECT
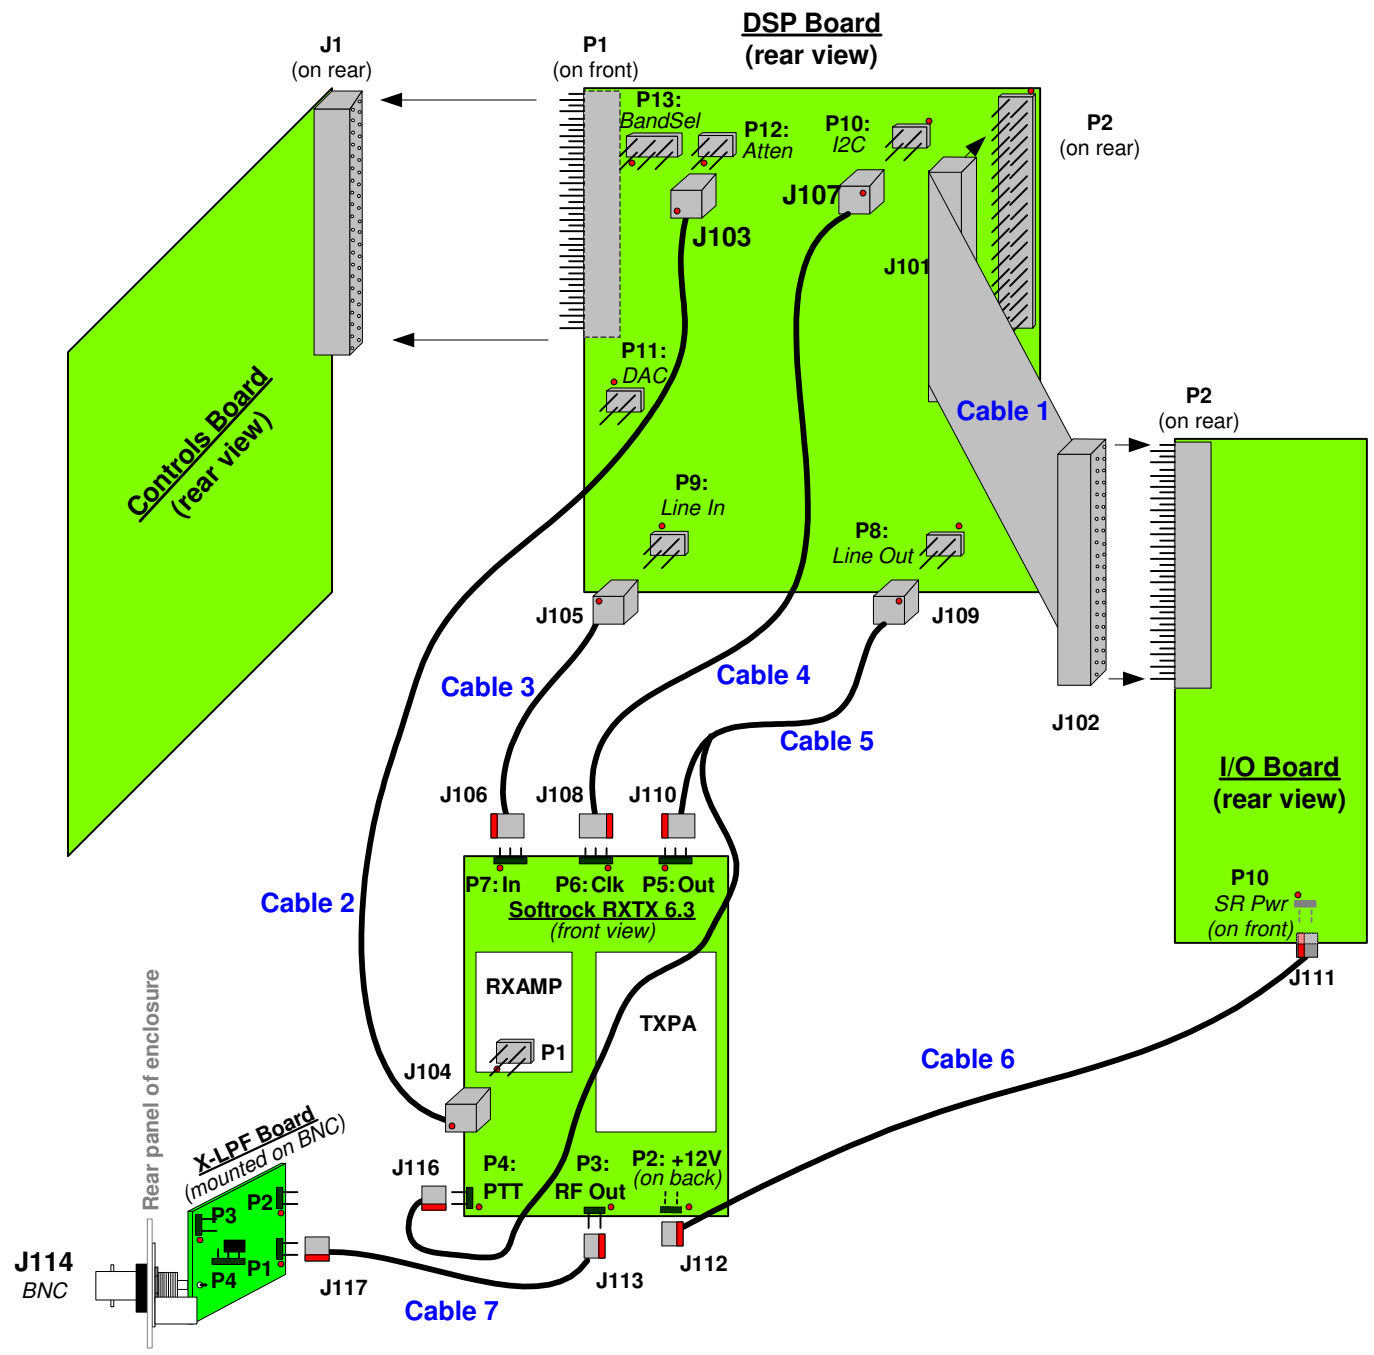

The "**Internal Cable Set**" connects signals from SDR Cube pc boards to the internal Softrock "RF front end".

External Cable Set

Connects signals from SDR Cube pc boards to a DB-15 connector on the rear of the enclosure to allow the Cube to control external Softrocks.

J115
(DB15-socket)
(Mounted on rear panel of enclosure)
"External Softrock"

P117
(DB15-pin)
With plastic shell.
Provided for mating external electronics.

NOTES:
(1) The External Cable Set is actually intended for use internal to the SDR Cube enclosure to connect the signals to the "External Softrock" connector on the rear panel of the enclosure. One would either use the Internal cable set or the External cable set - but not both at the same time.
(2) Cable 1 is included in both the Internal and External cable sets.
